

Instructions for use promo.”stonepad”

1. Steamclean the “stonepad” palette

2. Clean with distilled water and wait till the last drop of water despaired

3. Put your “stonepad” in a lower part of your promo.plastic box.

4. Adjust the level of distilled water in your pad according to the climate and preferred consistency of ceramics.

5. Apply modeling liquid first at the plate before adding a ceramic powder

6. "Stonepad" is made of specific stone from specific geographical region. Applied combination allows you to maintain desired consistency of a ceramic material for a long period of time. Make sure to clean your "stonepad" each few days&let it dry out naturally!
